## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-66, drawn to method of fabricating a discrete coil, classified in class 29, subclass 606.
  - II. Claim 67, drawn to a discrete winding, classified in class 336, subclass 213.
  - III. Claims 68-71, drawn to a clamp including a shape memory alloy, classified in class 148, subclass 421.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as method of fabricating a discrete coil and a discrete winding for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of fabricating a discrete coil in which the moving the core to adjusting the inductance of the coil can be performed by hand.

Inventions I and III are related as method of fabricating a discrete coil and clamp for its practice. In this case the clamp can be used to practice another and materially different process rather than the recited method in claims 1 and 34.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

Art Unit: 3729

operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions of II and III have different modes of operation and/or different functions, such as invention II do not require the changing in clamping state.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II and/or Group III, restriction for examination purposes as indicated is proper.

3. If applicant elects the invention of group I, claims 1-66, further restriction to one of the following species;

*Species 1A*, drawn to first aspect of the method (at pg 4, lns 12-17, readable on claims 1-33).

*1B*, drawn to second aspect of the method (at pg 4, lns 18-22, readable on claims 34-66).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3729

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to James Marc Leas on 4/18/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3729

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Trinh whose telephone number is (703) 305-2887. The examiner can normally be reached on Monday -Thursday 8:00 am to 4:30 pm.
